Education

Full Stack Development , Full time
Masai School , Bengaluru
May 2022 - Feb 2022

Bachelor of Science
Sambalpur University , Odisha
May 2018 - August 2021

Technical Skills

- HTML5
- CSS3
- JavaScript
- ReactJS
- Redux
- TypeScript
- NextJS
- Chakra UI
- Tailwind
- Ant Design
- Node JS
- Express
- Mongo DB
- NoSQL
- Data Structure
- Algorithms

Soft Skills

- Problem solving
- Decision making
- Leadership
- Attention to detail
- Time management

Interests

- Teaching
- Badminton
- Travelling

Enthusiastic and detail-oriented full-stack developer with specialization in MERN stack. Observant and curious, with a keen interest in building user-centric designs and translating business requirements into technical solutions. Looking forward to sharpening my skills in a demanding workplace.

Projects

Hospital Management System 🔗 🐙

An app that can be used for the management of a hospital. Tasks such as patient admission, report creation and more can be done with the app.

Tech-stack : ReactJS, Ant Design, NodeJS, Express, MongoDB
Collaborative project , Executed in 15 days
Features :
- Client-serving frontend side catering to users and patients
- Separate dashboard for nurses, doctors and admins
- Backend with proper authentication and a secured database

Areas of responsibility :
- Designed the frontend with all functionalities
- Developed the backend and schema of the project

Just Print Karo 🔗 🐙

JustPrintkaro is a printing-based website where users can purchase different products or request their own customized designs.

It is a live website that a client is using for their business. The website has been hosted using Hostinger.

Tech-stack : ReactJS, Redux, Ant Design, MongoDB, Express, NodeJS
A Group project built by 2 People in the span of 3 weeks.
Features :
- Fully responsive design with smooth UI
- Database management using MongoDB
- Backend with proper authentication

Areas of responsibility :
- Built the complete frontend UI with all functionality
- Integrated frontend with backend using redux

Task Planner 🔗 🐙

Task planner is a website where users can log in to their respective organization, create tasks, and sprints, assign tasks to different members, and edit and delete tasks and sprints.

Tech-stack : React, Redux, Ant-Design, Express, MongoDB
Individual project , Executed in 1 day

Areas of responsibility :
- Integrated proper authentication with Google sign-in.
- Built the complete frontend UI with all functionality
- Developed the backend and schema of the project
